

CLE-AC-160 - Standard

ACC COVER 160mm TRANSP

STANDARD LED 2D REPLACEMENT

- Easy Refitting in existing luminaries, no other gear required with standard board
- Module with integrated electronics on board
- 1450 Lumen Output
- Only 14.5 watts
- 3 Hour Emergency Available - Integrated separate emergency LED modules, controlled via EM powerLED
- Simple CORRIDOR FUNCTION Available in combination with any sensor
- Touch cover: Protection against direct touch of active parts
- Up to 50% Energy Saving
- 3 Year Guarantee
- CRI Ra 80

Easy to change from a 2D 28w lamp to energy efficient 14.5 watt LED board. No need for any additional components with the standard board, as you can wire straight from your 240V supply to the board.

All you need do is to remove the old components and fix direct to the base of the fitting or the gear tray where the lamp sits.
